10. [Total hospital bed utilization](#): 76%

Quarantine Q&A

Q: Can I end my quarantine if I have a negative COVID-19 test?

A: No. It may take up to 14 days for the illness to surface. Also, if a test is taken immediately after exposure, it will most often show up negative.

Q: What is the difference between isolation and quarantine?

A: Isolation and quarantine help protect the public by preventing exposure to people who have or may have a contagious disease.

1. Isolation separates people that have tested positive for COVID-19 from people who are not sick.
2. Quarantine separates and restricts the movement of people who were exposed to COVID-19 to see if they become sick.

Q: How long will I need to stay in quarantine if I was in contact with someone who tested positive for COVID-19?

A: Since it may take up to 14 days for you to have symptoms after infection, you will need to self-quarantine and self-monitor for 14 days from:

1. When you last had contact with the sick member of your household, OR
2. When the last sick member of your household recovered (the day they no longer had fever and had improvements in other symptoms).

Q: What if someone else in my household gets sick?

A: If someone who lives in your household gets sick and are unable to separate from others, all well members of your household need to extend their self-quarantine and self-monitoring for 14 days from the date the last person recovered from their illness.

Q: What if I get sick during quarantine?

A: Call your doctor if you need medical care, and isolate yourself from other well members of the house, if possible. More can be found at: [If you think you are sick](#).

REMINDERS

- **Call your healthcare provider before going into a clinic if you are experiencing mild to moderate symptoms of COVID-19.**
 - This will allow them to provide guidance, prepare ahead if you need to be seen, and minimize risk to others.
- **If you have any immediate questions, please call the United Way's Resource Line to speak with a trained specialist. It is available 24/7 for non-emergency questions about COVID-19 and referrals to local health and human services.**
 - Dial 211 on your phone
 - Text "COVID19" to 211-211 to receive links to CDC information.
 - Visit <http://211.org/>
 - Or contact Calumet County Public Health during business hours (Monday-Friday; 8:00 AM - 4:30 PM) at 920-849-1432.
- Visit the [Calumet County COVID-19 webpage](#) and scroll down to the 'Resources and FAQs' tab for a variety of helpful resources regarding COVID-19.
