WHAT'S NEW

DPI Releases School Guidance The Wisconsin Department of Public Instruction today issued *Education Forward*, a guidance document for Wisconsin district and school leaders to use as they plan for a safe, efficient, and equitable return to school for the 2020-21 school year amid the COVID-19 pandemic.

Education Forward provides health information, resources, and possible action steps aligned to closing out the current school year and preparing for and implementing provisions in the next school year. This guidance document is a starting point as schools consider the decisions they need to make and the conversations they need to have with local health authorities and their communities.

The document includes information on infection control and mitigation, lays out sample learning scenarios, and provides specific considerations for special education students, English language learning students, gifted and talented students, school libraries, teaching and learning staff, school safety/mental health, and out-of-school time programs. Resources such as a risk assessment tool, and a school nurse toolkit are also included.

COVID-19 CASES IN WISCONSIN
