FREQUENTLY ASKED QUESTIONS

What symptoms should school staff take into consideration when deciding to send a student home?

In children, symptoms of COVID-19 infection are non-specific and illness may mimic a number of other childhood viral infections. If a child is displaying mild symptoms, it may be best to send them home in case it is the beginning of a COVID-19 infection.

School-based healthcare providers or teachers should send a student home if within the last 24 hours, they have experienced the following symptoms above their baseline:

One of the following:

- Cough
- Shortness of breath
- Difficulty breathing

- New loss of taste or smell

OR two or more of the following:

- Fever or chills or rigors
- Muscle or body aches
- Headache
- Sore Throat
- Fatigue
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

OR if any of the following circumstances apply to the student:

- They have taken any medications (such as ibuprofen or Tylenol) to reduce fever in the last 24 hours.
- They have tested positive for COVID-19, with or without having symptoms, and have not yet finished their isolation period per public health recommendations.
- Have been diagnosed with COVID-19 by a healthcare provider, and have not yet finished their isolation period per public health
- Within the last 2 weeks, they have come in close contact with anyone who has COVID-19.

Where can I get a test?

- Call your primary care physician and request a COVID-19 test.
- Visit a community testing site. Click here to see additional community testing sites throughout Wisconsin.

Regional COVID-19 Testing Site Opening in Oshkosh at Sunnyview Expo Center

A new regional COVID-19 testing site is opening on Tuesday, Sept. 1 at Sunnyview Expo Center located at 500 E County Road Y, Oshkosh, Wis. Testing is free and will be conducted by the Wisconsin Army National Guard.

Beginning Tuesday, Sept. 8, the testing site will be open from 11 a.m. to 7 p.m. on Tuesdays and Thursdays and 8 a.m. to 4 p.m. on Mondays, Wednesdays, Fridays and Saturdays. There is currently no projected end date for this testing site.

"Data reports for our region consistently indicate a high COVID-19 activity level and positive case rate, however testing has been inadequate," said Doug Gieryn, health director/officer for the Winnebago County Health Department. "By partnering with the Wisconsin Army National Guard, our local healthcare partners and health departments across the region, we are now able to offer additional testing to help all those that need a test to get one."

Anyone who is experiencing symptoms of COVID-19 or has been in close contact with someone who has tested positive is encouraged to get tested. The community testing site is available to any Wisconsin resident, five years of age and older. Contact a pediatrician or healthcare provider for children four years of age and under. Symptoms of COVID-19 can include fever, cough, difficulty breathing, sore throat, runny nose, nausea, vomiting, diarrhea, headache, chills, muscle aches or loss of taste or smell.

It is highly recommended that you register ahead of time at register.covidconnect.wi.gov. To register, click on the blue button that directs you to a screening questionnaire. If there are multiple people in your family being tested, you can use

the same email address but a questionnaire must be completed for each individual.

While you are waiting for your test results, it is important that you limit contact with others and self-isolate to prevent spread of the virus should you test positive. Test results should be received via email and/or phone call within three to seven business days.

Additional information:
- Pre-registration is highly encouraged
- Antibody testing is not available
- No appointment is needed
- Walk-up testing is available
- A doctor's referral is not required
- Members of the Wisconsin National Guard will conduct the testing
- Language translation will be available
- Minors must be accompanied by a parent or guardian who can consent to the testing

This regional COVID-19 testing site was made possible through a collaboration between the Wisconsin Army National Guard and the health departments and emergency management teams from the City of Menasha, City of Appleton, Calumet County, Outagamie County and Winnebago County.
